3. Complete Step-by-Step Working Workflow (Step 1 to Step 10)

Standard Operating Procedure (SOP)

STEP 1 Sign In & Select Active Clinical Study

All Users

- Open `http://localhost:3000` (or Production URL `http://localhost:5000`) in your browser.
- Enter your assigned **Login ID / Email** and **Password** (or click *Quick Role / Student Login* to choose an account) and click **Sign In**.
- In the top navigation bar, click the **Active Study Selector pill** (e.g., `CLIN-001 — QVJ499 Normal Tension Glaucoma`) to switch between **CLIN-001** and **CARD-002** at any time.

STEP 2 Create or Delete a Clinical Study / Site Hierarchy (Admin Only)

System Administrator Only

- Navigate to **Administration → Studies & Sites** (`/studies`) in the left sidebar.
- Only **System Administrator (Tushar Patil)** sees the **+ Create New Study**, **+ Add Country**, **+ Add Clinical Site**, and 🗑️ **Delete Study** buttons.
- Non-admin roles see a 🔒 **View-Only Hierarchy Mode** badge so unauthorized users can never modify or delete trial structures.

STEP 3 Navigate the eTMF Repository & 11 DIA Zones

All Users

- In the left sidebar under **eTMF Repository**, click:
  - **All Studies (CM Folder):** View all clinical study master folders and their real-time completeness metrics.
  - **Study Folder (CLIN-001 or CARD-002):** Expand the arrow ▸ next to any study to jump directly to a specific **Clinical Site (SITE-01 to SITE-06)** or any of the **11 DIA TMF Zones (Zone 01 to Zone 11)**.
  - **Student Training Sites:** View all 6 Clinidea student site folders with direct one-click access to each student's site eTMF.

STEP 4 Upload a Real Clinical Document (4-Step ALCOA+ Wizard)

TMF Manager · CRA · Site User · Doc Controller · Admin

- Click the blue **Upload Document** button in the top navigation bar (or click ☰ **Menu → Add Document** inside the Repository).
- **Wizard Step 1 (File Drop & Hash):** Select any real file from your computer (**PDF, Image `.png/.jpg/.webp`, Text/CSV, or Word/Excel `.docx/.xlsx`**). The system immediately computes a cryptographic **SHA-256 Checksum Hash**.
- **Wizard Step 2 (DIA TMF Classification):** Choose the target **Zone (01–11)**, **Section**, and **Artifact** (e.g., *Zone 06 → 06.01.01 Principal Investigator CV*).
- **Wizard Step 3 (Clinical Metadata):** Confirm the Document Title, Version (`v0.1` or `v1.0`), Country, Site ID, and Effective/Expiration Dates.
- **Wizard Step 4 (ALCOA+ Attestation):** Verify the 4 mandatory ALCOA+ quality checkboxes (*Legible, Attributable, Complete, Certified Copy*) and click **Submit & Upload to eTMF**.

STEP 5 Live View / Preview, Rename & Delete Uploaded Files

All Users with Upload / Edit Permission

- **Live File Preview:** Immediately after upload (or by clicking 👁️ **View File** on any document row), the **Document Viewer Drawer** opens:
  - **PDF & Text Files:** Rendered live inside the built-in interactive document frame.
  - **Images (PNG/JPG/WEBP):** Rendered at full resolution with Zoom In / Zoom Out (`50% – 200%`) controls.
  - **Word/Excel Files:** Displays a direct file preview card with ↗ **Open in Browser** and ⬇ **Download Original** buttons.
  - Use the top toggle to switch between 📄 **Actual Uploaded File** and 🛡️ **ALCOA+ Certified Sheet**.
- 🖍️ **Rename Document / File Name:** Click the 🖍️ **Rename** button in the Explorer table row or inside the Document Viewer toolbar to update the Document Title and File Name (logged automatically in the Part 11 Audit Trail).
- 🗑️ **Delete Document:** Click the 🗑️ **Delete** button on the document row or inside the Viewer toolbar to permanently remove an uploaded file.

STEP 6 Document Check-Out Locking & Version Control (v1.0 → v2.0)

CRA · TMF Manager · Doc Controller · CTM

- Inside the **Document Viewer Drawer** (or **Version Control** page), click 🔒 **Check Out & Lock** before editing a document so no other user can overwrite it concurrently.
- Click **+ Create New Version** inside the repository or viewer to increment the version number (e.g., `v0.1 → v1.0` or `v1.0 → v2.0`) with a mandatory Revision Reason.

STEP 7 Quality Control (QC) Review & Query Management

TMF Manager · Doc Controller · QA Auditor · CTM

- Open **Workflow & Quality → QC Review Queue** (`/qc-queue`) or open any uploaded document in the **Document Viewer Drawer**.
- In the right-hand **SOP-TMF-04 Quality Control Panel**, enter review comments and click one of the 3 decisions:
  - ✓ **Pass & Approve QC** — Sets QC Score to **Green** and Status to **Approved**.
  - ? **Raise Query** — Flags a quality discrepancy (e.g., *Missing PI Signature*) and routes it to the **Queries** module (`/queries`).
  - ✕ **Reject** — Marks QC as **Failed (Red)** and returns the document to Draft for re-upload.

STEP 8 21 CFR Part 11 Electronic Signature Execution

PI · CTM · TMF Manager · System Admin

- Open an approved document in the **Document Viewer Drawer** and click ✍️ **Sign (Part 11)** in the top-right header.
- Select the **Signature Meaning** (e.g., *Author Approval, Principal Investigator Attestation, or QA Final Release*), enter your password to re-authenticate, and click **Execute Electronic Signature**.
- The document status becomes **Effective**, permanently binding the signatory's name, UTC timestamp, and cryptographic SHA-256 signature hash onto the document.

STEP 9 Expected Document List (EDL), RAG Quality & Completeness Reports

All Clinical & Oversight Roles

- **Expected Document List (`/edl`):** Tracks mandatory vs. filed artifacts across all sites and generates placeholders for missing essential documents.
- **Quality Metrics (`/quality`) & Timeliness SLA (`/timeliness`):** Monitors Red-Amber-Green (RAG) site health scores and filing lag days.
- **Completeness Reports (`/reports`):** Exports full CSV Study Index Manifests for sponsor and regulatory submissions.

STEP 10 21 CFR Part 11 Audit Trail & Regulatory Inspector Portal

QA Auditor · Regulatory Inspector · Admin

- **21 CFR Part 11 Audit Trail (`/audit-trail`):** Every single action (`DOCUMENT_UPLOADED`, `DOCUMENT_RENAMED`, `DOCUMENT_DELETED`, `QC_REVIEW_PERFORMED`, `ESIGNATURE_EXECUTED`) is permanently recorded with User ID, Role, Timestamp, Old Value, New Value, and Reason, with one-click **Export CSV**.
- **Inspector Portal (`/inspector-portal`):** Provides a dedicated, read-only regulatory inspection room for FDA / EMA / CDSCO inspectors to verify certified copies and audit trails.
